CAREER OBJECTIVE

Motivated and detail-oriented Information Science And Engineering undergraduate seeking a challenging role in a dynamic, innovation-driven organization. Eager to apply strong skills in programming, data analysis, and problem-solving to design scalable, efficient solutions.

TECHNICAL COMPETENCIES

- Operating systems: Windows(all), Linux, Android
- Programming Languages: Java, C, Python, HTML, CSS, JavaScript, ReactJs, NodeJs
- Tools: Visual Studio Code, Jupyter Notebook, MySQL, MongoDB, Android Studio
- Developer Tools & Software: VS Code, PowerBI, Tableau, LaTeX, MS Excel

PROJECT

- **Title:** AgriHelp – AI & ML Powered Crop Recommendation System(Major Project)

Description: AgriHelp is an AI-driven web application designed to assist farmers in making data-informed agricultural decisions. The system recommends the most suitable crops for a given field based on soil parameters, environmental conditions, and market pricing. It also detects plant diseases from leaf images and suggests appropriate fertilizers.

Tech Stack: Python, Scikit-learn, TensorFlow, Django, Clerk, Real-time price and weather APIs

- **Title:** Message Encryption Technique with Two Layers of Security Using Image Steganography

Description: A code was developed to securely encrypt a message and embed it within an image. This encrypted image is further concealed within another image, offering an additional layer of protection. The approach ensures confidentiality and makes the data indistinguishable from normal images, enhancing security during transmission

Tech Stack: Python, Object-Oriented Programming(OOP), Cryptography Libraries, PIL(Python Imaging Library)

EDUCATION

Degree	Institute	Year	Grade
B.E in Information Science	CMR Institute of Technology, Bangalore	2026	8.53/10
Pre-University	Expert PU College, Mangalore	2022	96.16%
SSLC	PoornaPrajna Education Centre, Bangalore	2020	96.8%

ACHIEVEMENTS

- 1st place in a technical exhibition for the project “Digital Distance Meter Using Arduino”
- Participated in Amazon SAMBHAV Hackathon
- Finalist in HappyFox GEN-AI Hackfest
- Finalist in SYNTHACK by DSATM

CERTIFICATES

- Computer Networks and Internet Security- Infosys SpringBoard
- Artificial Intelligence in Python– Infosys Springboard
- DevOps - More Than Just Dev & Ops - Infosys Springboard
