PROFESSIONAL SUMMARY

- Information Science student with hands-on experience in software development, backend systems, and web application development. Proficient in Python, Java, Django, Flask, SQL databases, REST APIs, and version control, with strong problem-solving skills.

EDUCATION

CMR Institute Of Technology

Bachelor of Engineering in Information Science And Engineering- CGPA: 8.53

Bangalore, Karnataka

Nov. 2022 – May 2026

Expert PU College

12Th Grade- Percentage: 96.16

Mangalore, Karnataka

Sept. 2020 – June 2022

EXPERIENCE

Generative AI Intern

Dec 2025 – Jan 2026

Daacoworks Technologies Private Limited

Bangalore, Karnataka

- Built an AI-powered CMMS backend using Node.js, Express, Open Ai, and Qdrant to answer maintenance queries via semantic search.
- Implemented a RAG pipeline for accurate, context-aware responses over work requests and work orders.
- Designed a decoupled ingestion and query architecture to ensure consistent, snapshot-based answers.
- Exposed secure REST API tested with Postman for chatbot integration

PROJECTS

AgriHelp(Major Project) | *Python, CNN, SQL Lite, Real-time price API, Flask web framework*

- Designed and executed an ML-based crop recommendation engine using historical soil, weather, and yield data to improve decision accuracy.
- Integrated real-time weather and market price APIs to provide dynamic, location-based crop insights for farmers.
- Built secure and scalable backend services using Flask and SQLite, ensuring efficient data handling and fast response times.
- Provided AI-generated explanations for recommendations to improve transparency and farmer trust in the system.

Veda-verse – GEN-AI Powered Learning Web Application | *Django, Open Ai, Gemini AI, HTML, CSS*

- Developed a personalized AI-assisted learning platform using Django to enhance interactive and self-paced education.
- Integrated Open Ai with Retrieval-Augmented Generation (RAG) to generate contextual explanations, summaries, and flowcharts from uploaded documents.
- Applied Gemini AI for OCR and sketchbook-based interactions, enabling learning directly from scanned PDF s and handwritten content.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML/CSS

Databases: MongoDB, MySQL, PostgreSQL

Frameworks: React, Node.js, Flask, Fast API

Developer Tools: Git, Docker, Power BI, Tableau, VS Code, Visual Studio, Eclipse

PUBLICATION

“Smart Crop Recommendation Systems Leveraging AI and Machine Learning Techniques” International Journal of Research Publication and Reviews, Vol 6, Issue 12, pp 6385-6391 December, 2025

ACHIEVEMENTS

- Received scholarship of academic excellence for consistently achieving commendable grades (2022–2025).
- Secured 1st place in a technical exhibition for the project *Digital Distance Meter Using Arduino* (2023).
- Finalist in GENAI-Hackfest organized by HappyFox (2025).
